Comments: Introductory comments to near-death experience (NDE)

This page contains 40 non-Western near-death experiences (NDEs) shared with NDERF from October 10, 2004 – September 9, 2011

Methodology:

Experiences were scored as near-death experiences (NDEs) if they met all of the following:

1. A lucid, organized experience occurring at the time of a life-threatening event so severe that there is unconsciousness or clinically apparent death with an absent heartbeat.
2. An NDE Scale score of 7 or higher.
3. Shared by the individual who personally had the NDE.
4. Shared in English via the completed survey form on nderf.org.

These are NDEs from a prior version of the NDERF survey (nderf.org). They are sequentially shared NDEs from October 10, 2004 – September 9, 2011. All accounts were scored as NDEs if they met the above criteria and regardless of experience content to avoid bias in studying the content of the NDEs.

The NDEs posted on the NDERF website are edited to correct obvious spelling and grammar errors. As remarkable as the NDEs are in this list, please remember that they accurately represent the real experiences of near-death experiencers from all walks of life and around the world.
